DESCRIPTION

The 2024 Volkswagen Golf TSI R is a high-performance hatchback that combines practical design with advanced engineering. This model features a 2.0-litre petrol engine paired with a four-wheel drive system, ensuring consistent power delivery and traction across various road conditions. As a Euro 6 compliant vehicle, it meets current emission standards while delivering a driving experience focused on responsiveness and control. The R trim level provides a distinct aesthetic and functional package, making it a well-rounded choice for those seeking a modern and capable vehicle.

This model distinguishes itself through a range of premium features designed to enhance both comfort and convenience. The inclusion of Dynamic Chassis Control allows the driver to adjust the suspension settings to suit different driving styles, while the 19-inch Estoril black alloy wheels add a refined visual touch. Practicality is prioritised with a large boot space for luggage and front and rear parking sensors, including parking assistance, to simplify manoeuvring in tight spaces. Passengers benefit from the addition of rear side airbags and an opening panoramic sunroof, which creates a more open and airy cabin environment. With the ability to accelerate from 0 to 62mph in 4.7 seconds, this vehicle offers a level of performance that sets it apart from many standard hatchbacks.
